

DAY- 5 AWS CLOUD WATCH

AWS Architecture and Design

1. Day 1 Overview of Cloud Computing
2. Day 2 Overview of AWS
3. Day 3 Amazon EC2*
4. Day 4 Amazon EBS *
5. **Day 5 Amazon CloudWatch ***
6. Day 6 Amazon S3*
7. Day 7 Amazon Elastic Load Balancer *
8. Day 8 Amazon Auto Scaling *
9. Day 9 Amazon VPC *
10. Day 10 Amazon IAM *
11. Day 11 Amazon RDS
12. Day 12 Amazon Route 53 *
13. Day 13 Amazon DynamoDB* & Glacier
14. Day 14 Amazon Cloudfront* & Import Export & Amazon SES *
15. Day 15 Amazon ElasticBeanStalk & Amazon Cloudformation & Amazon OpsWorks
16. Day 16 AWS Economics & AWS Account Overview *
17. Day 17 AWS Architecture
18. Day 18 AWS Certification Preparation

[With Hands on Demo]

AWS Cloud Watch

AWS Cloud Watch

- Till now we learned
- What is Cloud Watch?
- What is a Metric
- What are use cases for Cloud Watch

We are now going to see AWS Cloud Watch Demo

Pre-requisite

→ Pre-requisite

→ You have launched an instance with AWS EC2

→ CW Demo Steps

- 1) Launch one Instances
 - 1) Check Status of Instance
 - 2) View Detailed Monitoring
- 2) Go to Cloud Watch Console
 - 1) Check Metrics
 - 2) Set Alarms
 - 3) Set Billing Alert

We learned about:

- » What is AWS Cloud Watch
- » Metrics & Cloud Watch Alarms
- » Hands on with Cloud Watch

In next session we will have overview about how to use AWS Simple Storage Service: AWS S3
