DAY- 7
AWS ELB

IntelliPaat

AWS Architecture and Design

1. Day 1 Overview of Cloud Computing
2. Day 2 Overview of AWS
3. Day 3 Amazon EC2*
4. Day 4 Amazon EBS *
5. Day 5 Amazon CloudWatch *
6. Day 6 Amazon S3**
7. **Day 7 Amazon Elastic Load Balancer ***
8. Day 8 Amazon Auto Scaling **
9. Day 9 Amazon VPC **
10. Day 10 Amazon IAM **
11. Day 11 Amazon RDS
12. Day 12 Amazon Route 53 **
13. Day 13 Amazon DynamoDB* & Glacier
14. Day 14 Amazon Cloudfront* & Import Export & Amazon SES **
15. Day 15 Amazon ElasticBeanStalk & Amazon Cloudformation & Amazon OpsWorks
16. Day 16 AWS Economics & AWS Account Overview **
17. Day 17 AWS Architecture
18. Day 18 AWS Certification Preparation

[With Hands on Demo]

AWS ELB

AWS ELB

→ Till now we learned

→ What is ELB?

→ How do you distribute load with ELB

→ ELB Key Features

We are now going to see AWS ELB Demo

Pre-requisite

$\rightarrow$ Pre-requisite

$\rightarrow$ You have launched an instance with AWS EC2

Demo

→ CW Demo Steps

1) Launch two Instances

    1) Configure Apache on two

    2) Choose different output for both

    3) Setup ELB and Check flow

2) For ELB setup sticky session

    1) Check Output

Summary

We learned about:

 » What is AWS ELB
 » Use Case and Scaling with ELB
 » Hands on with ELB

In next session we will have overview about How to use AWS
Auto Scaling: AWS Auto Scaling

Thank You
